

# TRENT GOMEZ-VIDAL

Product Designer with 5 years of experience and a speciality in crafting intuitive flows for complex tasks across internal tools and B2B products . My work history spans Immersive Entertainment and Regulation FinTech platforms.

## Experience

### Product Designer, Cosm - (Immersive Entertainment, B2B2C)

November 2023 - December 2025 / Los Angeles, CA

- Owned end-to-end design for CX Pro, a 0-to-1 internal operations platform, from concept to a shipped MVP.
- Partnered with the Unreal Engine, front-end, and run-time technology teams to align design with real-time system constraints and mediated design with build strategy.
- Built the case for a consumer-grade, iPadOS version of CX Pro by mapping prospective client needs against existing user journeys, winning stakeholder buy-in for a more familiar and intuitive experience ahead of a B2B2C launch.
- Designed high-fidelity prototypes with AI and wireframes for consumer-facing pages that served as the primary marketing touchpoint for immersive experiences, shaping how audiences discovered the technology and converted interest into ticket sales.
- Diagnosed CMS inefficiencies and pitched a content restructuring to C-suite, scaling content production workflows for long-term organizational growth.
- Transformed a design system into a B2B component library, defining tokens and usage guidelines and embedding WCAG accessibility checks.

### Product Designer, Eventus - (Compliance Fintech, B2B, SaaS)

September 2021 - July 2023 / Los Angeles, CA

- Translated complex risk-monitoring workflows into clear user flows through intuitive data visualizations, resulting in a 72% increase in user satisfaction.
- Ran user interviews and usability testing to identify issues and refine workflows.
- Synthesized research insights into actionable recommendations that guided product decisions and improved workflow efficiency.

### UI/Visual Designer, ICONIC Protein, Freelance - (B2C, Nutrition)

May 2019 - September 2021 / Los Angeles, CA

- Designed consumer-facing web and mobile experiences, producing responsive layouts, visual assets, and interaction designs aligned with brand goals and usability best practices
